

## Case 1

Clock Button Should be highlighted by default. If the Clock Button is highlighted then current time should be displayed

## Case 2

For Case 2 use can Start the stop watch by clicking on the start text. As soon as the user clicks on the start button The start text should be changed to Stop text and the Timer/ Stop Watch should start. When a user clicks on the stop Text the Stopwatch should Stop. On Clicking on the Reset button The timer should go into the initial state.

Note: While the timer is running if the user clicks on the clock button the state of the timer should not be lost. (The Timer should run/execute in the background) On switching back to the stop Watch the timer should still be ticking.

(Note: DOM Manipulation  
should not be done in  
React Project)  
Time Duration: 4Hrs
